Important Design Rules

- Uses the colours which are displayed outside the slide in the presentation master. If possible, always combine vertically or horizontally so that there is a coherent picture.

- Uses the exemplary text fields and slides as orientation

- Use SAME style of slides for the groups! Find a common style and e.g. create a template

- Try to show graphics instead of pure text and then add text as text boxes. For example a new feature via screenshot and then animated text boxes.

- Always **only Arial** as font

  - Maximum size of font: 18; Minimum size: 10

Example Slide
Example using Screenshots

Das Aluminium CNC-Frästeil soll durch eine generatives SLM-Bauteil ersetzt werden.

Definition von Funktionsfeatures (Non-Design Features) und Bauraum (Design Features). Die zylindrischen Teile bleiben im generativen Bauteil erhalten.

Eigens konzipierte AI Engine definiert generische Lastfälle und gestattet Domänenbezug
